

The Global Network Infrastructure Advantage

Transformative Results Without Transformational Investments

Andy Alarcon

The Opportunity

Network and infrastructure power every critical business function—from cloud platforms and AI automation to customer engagement and supplier connectivity. Yet despite their strategic importance, they remain among **the most under-optimized areas of enterprise spend and performance.**

Over time, complexity takes hold: fragmented contracts, cumbersome workflows, legacy services, opaque billing, and slow-to-react support models. The result is avoidable cost, reduced efficiency, and substantial risk across the organization.

Advantage delivers a proven, innovative model that addresses these challenges system-wide. We simplify complexity, increase transparency, and optimize performance to unlock immediate, sustainable economic value without capital investment.

The Advantage Proposition

Advantage partners with clients to develop and implement a **zero-cost, zero-obligation** Network & Infrastructure business case—delivered through a high-touch, white-glove experience and backed by a minimum 20% hard-dollar savings guarantee.

A Business Case is a data-driven financial, operational, and technical assessment that establishes a client's current-state scope, identifies savings by workstream (i.e. data circuits, voice, WAN/LAN, contact center, mobility), and **defines a clear execution roadmap** showing how, where, and when results are realized.

Based on our work with over 2,400 global clients, we typically see **40%+ average savings delivered** through contract optimization, service rationalization, vendor consolidation, technology improvements, and operational efficiencies—all with minimal client effort and without any disruption to business operations.

Solution Breadth & Depth

NETWORKING SOLUTIONS

- [DIA](#)
- [Broadband](#)
- [Fixed Wireless](#)
- [Managed WiFi](#)
- [MPLS](#)
- [Secure Remote Access](#)

Key Deliverables & Results

- **Zero-Cost Business Case:** A tailored roadmap and detailed plan that optimizes savings and improvement across your global network and infrastructure.
- **Guaranteed 20% Minimum Savings:** With ~40% average savings historically realized and ~\$880K in annual savings per client on average.
- **White-Glove Implementation & Support:** Includes voice, data, WAN/LAN, contact center, and mobility—no capital investment and minimal internal resource burden; accordingly, we not only identify the savings, but we implement and ensure they are fully realized.
- **Operational Excellence:** Our Command CenterSM platform provides end-to-end visibility across connectivity, inventory, and spend—powering smarter, data-driven decisions.
- **Reduced Risk:** Minimize vendor, contract, and operational risk through standardization and governance.

Getting Started

- **Mutual NDA** to enable secure information sharing between Advantage and your business
- **Letter of Authorization (LOA)** allowing Advantage to collect current-state inventory and billing data directly from incumbent technology providers
- **Business Case SOW** execution formalizing Advantage's commitment to deliver a zero-cost Business Case with a minimum guaranteed 20% savings
- **One recent month of invoices** to identify incumbent vendors and validate summary-level services and spend

Advantage handles the rest—from analysis through execution.
